### CAREER OBJECTIVE:

Looking for a challenging opportunity to work with a global manufacturing company where I can explore skill-sets and contribute towards organizational growth, along with scope for personal development

### *Professional*

With 05 years of experience in maintaining and servicing industrial machines, I have worked with diverse production companies and projects, and ensured optimal functionality of machines involved in the daily production process. I have successfully delivered maximum run time, and helped minimize the idle time of machines, thereby ensuring optimized productivity all the time.
