### SKILLS

- Radiation protection
- Portable X-Ray Machinery
- Patient Lifting/Handling
- Trauma Experience
- Orthopedic Experience
- Direct/ Digital Radiography
- Health Quality Improvement
- Radiology
- Radiographic Equipment
- Barium meal follow-through, and HSG

I am a skilled X-ray and CT scan technician with comprehensive expertise in diagnostic imaging technology and processing software, dedicated to delivering accurate and high-quality medical images.

### WORK EXPERIENCE

#### Jagdamba Diagnostics Pithoragarh, Uttarakhand (6 months)

- Performed documenting and defining the scan sequences by entering data and commands into the computer and watching the video display to change the contrast or density.
- Skilled at taking diagnostic pictures, updating patient records, and providing critical information to the physician.
- Capable of keeping an eye on patients throughout exams, guaranteeing their safety, and adhering to protocols to avoid needless radiation exposure.

#### Amarleela Hospital Delhi (1 year)

- Performed quality imaging studies through verification of patient identification and physician order, with technical accuracy and completeness of examination.
- Ensured quality and safe patient care while in the service area through effective communication and proper use of all patient apparatus.

#### Orchid Hospital (2 year)

- Maintained patient one on one directly with the patients, reps, and other hospital staff when working at the satellite clinic.
- Maintained patient film records and requested prior records from other medical facilities and re-sent examinations for reevaluation after receiving prior record.
